

Astika Urmaliya

Data Analyst

✉ aastikau8@gmail.com ☎ 7722822257 📍 Gurgaon, India

PROFESSIONAL SUMMARY

Data professional skilled in data analysis, reporting, and machine learning with hands-on experience in Python, SQL, Excel, Streamlit, and Flask. Built end-to-end projects including a house price prediction model with R^2 score of 0.89 and customer segmentation solutions to generate business insights using real-world datasets. Experienced in operations and client support roles managing 80–90+ requests daily while ensuring SLA-driven service delivery and stakeholder coordination.

TECHNICAL SKILLS

Machine Learning

- Regression
- Classification
- Clustering
- Model Evaluation

Tools & Technologies

- Streamlit
- Flask
- Git
- Jupyter Notebook
- Anaconda

Data Techniques

- Data Cleaning & Data Visualization
- Feature Engineering

Programming

- Python
- SQL

Libraries

- Pandas
- NumPy
- Scikit-learn
- Matplotlib
- Seaborn

Concepts

- Statistics
- Predictive Modeling
- RFM Analysis

PROFESSIONAL EXPERIENCE

Travel Consultant – B2C Hotels, Atripguy

Free-lance

- Handle customer escalations and operational requests across hotel booking processes.
- Coordinate with hotels and partners to ensure timely issue resolution and service delivery.
- Manage high-volume requests while maintaining operational timelines and customer satisfaction.

Travel Consultant – Corporate Escalations, Yatra Online Pvt. Ltd.

06/2022 – 05/2025

- Managed 80–90+ client requests daily including escalations, booking modifications, and operational coordination while maintaining SLA/TAT compliance.
- Worked with corporate clients including EY and PwC ensuring operational accuracy and stakeholder satisfaction.
- Utilized Excel reporting and workflow tracking to manage requests, operational updates, and service quality.

PROJECTS

House Price Prediction Web Application

- Developed an end-to-end machine learning application for predicting residential property prices using regression models.
- Performed data preprocessing, feature engineering, and model evaluation using Python and Scikit-learn achieving R^2 score of 0.89.
- Built and deployed an interactive prediction interface using Streamlit.

Personalized Song Recommendation System Using Clustering

- Developed a music recommendation system using DBSCAN clustering and cosine similarity techniques.
- Applied TF-IDF Vectorizer to improve recommendation relevance based on song metadata and user preferences.
- Integrated and deployed the solution using Streamlit and Flask.

Customer Segmentation for Targeted Marketing Campaigns

- Implemented customer segmentation using K-Means clustering and RFM analysis on real-world datasets.
- Identified high-value customer groups to generate business insights and support targeted marketing strategies.
- Visualized analytical insights using Matplotlib and integrated the solution using Flask.

EDUCATION

Bachelor of Science (B.Sc.), AKS University

2021

CERTIFICATIONS

Data Science Certification — EXCELR
2024

AI Python Workshop — Advanced Training in Artificial
Intelligence using Python
